# **Environmental Services Laboratory**

350 Hills Street, Suite 107, Richland, WA 99354 (509) 377-8058 FAX (509) 377-8464

**ANALYSES LIST, 2023** 

## NOTE: All prices are subject to change without notice.

**Energy Northwest** Environmental Services laboratory has provided a wide range of environmental monitoring and analytical services to individual, municipal, commercial, and utility customers since 1992. The team provides the highest quality chemical analysis, ecological monitoring assessment, and environmental & radiochemical analysis.

Energy Northwest's Environmental Services team is qualified and experienced; clients routinely call on us to help solve the most difficult analytical problems as well as handle routine needs.

The laboratory maintains accreditation for wastewater, drinking water, radiochemical analyses, and licensure as a clinical laboratory for drug screening.

#### **Sample Turn Around**

Standard turn-around times for analytical results are normally from 10 to 15 working days. Completion times for samples vary according to the number and nature of the tests required. Priority turn-around times can be provided for most tests. Energy Northwest Environmental Services Laboratory does not guarantee a set turn-around time to anyone except those who are paying additional rush fees. Samples to be analyzed for more than one contaminant will have the turn-around time associated with the longest analysis. It is not our policy to write partial reports. Contact the laboratory for priority availability and pricing.

#### **Rush Charges**

Energy Northwest Environmental Services Laboratory must be notified of and approve all rush order requests prior to receiving samples. Without prior approval, we cannot guarantee turn-around times. Although Energy Northwest Environmental Services Laboratory meets most rush requests, should a guaranteed time be missed, there will be no rush fees charged. Please call for availability and pricing before shipping rush samples. Rush projects are reported by 5 pm on the day requested and will be billed at the following rates:

| 10-15 Days | Listed Price |
|------------|--------------|
| 7-9 Days   | Add 40%      |
| 6 Day      | Add 50%      |
| 5 Day      | Add 60%      |
| 4 Day      | Add 70%      |
| 3 Day      | Add 80%      |
| 2 Day*     | Add 90%      |
| Next Day*  | Add 100%     |
| Same Day*  | Add 200%     |

<sup>\*\$100</sup> minimum fee for rush analysis of 2-days or less.

### **Additional Fees**

Additional fees may be applicable for non-routine sample preparations. Level III or IV reports are available at an additional charge. Prices are subject to change. Please contact us at <a href="mailto:envirolab@energy-northwest.com">envirolab@energy-northwest.com</a> for quotes or to verify current pricing.

# **Drinking Water Analyses**

## BACTERIOLOGICAL

| Parameter                   | <b>Analytical Method</b> |
|-----------------------------|--------------------------|
| Coliform (Presence/Absence) | SM 9223 B                |
| Coliform, Fecal             | SM 9221 B, C, E1         |
| Coliform, Total             | SM 9221 B, C, E1         |

## **DISINFECTION BY-PRODUCTS**

| Parameter                    | <b>Analytical Method</b> |
|------------------------------|--------------------------|
| Haloacetic Acids (HAA5)      | SM 6251 B, EPA 552.2     |
| Organic Carbon, Total        | SM 5310 B                |
| Total Trihalomethanes (TTHM) | EPA 524.2, 524.3         |
| TTHM & HAA5                  | EPA 524.3 & SM 6251 B    |
|                              | EPA 524.2 & EPA 552.2    |
| Chlorite                     | EPA 300.1                |

## PRIVATE HOUSEHOLD TESTING PACKAGES

| Parameter                                     | <b>Analytical Method</b> |
|---|--------------------------|
| Arsenic                                       | EPA 200.8                |
| Arsenic & Coliform (Presence/Absence)         | EPA 200.8/SM 9223 B      |
| Coliform (Presence/Absence), Nitrate, Arsenic | Various                  |
| Coliform (Presence/Absence) & Nitrate         | Various                  |
| Lead & Copper, Coliform (Presence/Absence)    | EPA 200.8/SM 9223 B      |
| Lead & Copper                                 | EPA 200.8                |
| Washington Complete IOC                       | Various                  |

### **INORGANIC CONTAMINANTS**

| Parameter   | Analytical Method         |
|---|---------------------------|
| Anions: Single Anion  | EPA 300.0                 |
| Each Additional Anion: (Bromide, Chloride, Fluoride, Nitrate, Nitrite, Sulfate) |                           |
| Alkalinity  | SM 2320 B/EPA 310.1       |
| Ammonia   | SM 4500 NH3               |
| Asbestos  | EPA 100.2                 |
| Chlorine, Total Residual  | SM 4500-CI G              |
| Color   | SM 2120 B                 |
| Conductivity  | SM 2510 A/EPA 120.1       |
| Cyanide, Total  | EPA 335.4/SM 4500 CN- E   |
| Dissolved Oxygen  | SM 4500-O G               |
| Hardness  | SM 2340 B/EPA 200.8       |
| Hexavalent Chromium   | EPA 218.6                 |
| Hydrogen Sulfide  | SM 4500-S <sup>2-</sup> F |
| Mercury: CVAA   | EPA 245.7                 |

| Radium-226                               | EPA 903.0                |
| Radium-228                               | EPA 904.0                |
| Tritium                                  | SM 7500 <sup>3</sup> H B |
| Uranium, Natural                         | EPA 200.8                |

#### **ANALYSES LIST, 2023**

### **Additional Information**

### **Analytical Methods**

ASTM: American Society for Testing and Materials ASTM Standards

EPA: Environmental Protection Agency Methods and Guidance for Analysis of Water

NWTPH: Washington State Department of Ecology methods

SALI: Energy Northwest Supplemental Analytical Laboratory Instructions SM: Standard Methods for the Examination of Water and Wastewater

SW 846: Environmental Protection Agency *Test Methods for Evaluating Solid Waste Physical/Chemical Methods* 

The methods listed are those most commonly used, selected to conform to regulatory requirements and accepted scientific practices. An individual sample may contain materials interfering with a specific method listed above and preventing determination of the tested parameter. In these cases, with approval of our customers our analysts can usually provide accurate results using an alternate method. Any alternate methods used will be listed on the sample report.

#### **Subcontracted Analyses**

The Energy Northwest Environmental Services Laboratory offers sample tracking, shipping, results reporting and invoicing for several analyses that are not cost-effective to perform in our facility. Only cooperating laboratories with appropriate accreditations are used, and they have been selected based on both price and quality of service. In periods of unusually high sample loads or instrumentation difficulties, our cooperating laboratories also may perform some analyses we usually provide. Please call to request a quote for any analyses needed that are not listed on this capabilities list. We would be happy to help coordinate testing through a partner laboratory.

### **Additional Capabilities**

Along with the listed chemical tests, we offer other specialized services. Environmental sampling, identification of unknowns, analysis of non-standard chemicals or matrices, thermal testing, individual agricultural chemicals and analytical method development are some of the available services. Call to request a quote for any of your requirements not included in this price list.

#### Note on our commitment to the environment

Energy Northwest is committed to protecting the environment for current and future generations. As part of that commitment, we have developed, implemented, and maintain a comprehensive Environmental Stewardship Program (ESP). The goal of the program is to promote environmental stewardship, continually improve environmental performance, and ensure regulatory compliance.
