CAPABILITIES STATEMENT

Calibration Lab

Powering Our Future Through Excellence

The Energy Northwest Standards Laboratory offers a broad range of calibration services for all your measurement and test equipment needs. Our calibration staff can perform calibration services at your site or in our laboratory.

With inventory of more than 700 calibration standards, Energy Northwest covers numerous metrology disciplines. The Standards Laboratory is staffed by highly trained professionals. Their extensive training covers multiple disciplines and numerous manufacturers, guaranteeing quality instrument calibration.

CALIBRATION & TESTING SERVICES

- Dimensional
- Electrical & Electronic
- Flow
- Torque & Force
- Mass
- Light & Sound
- Pressure
- Field Calibrations
- Temperature & Humidity
- Time & Frequency
- Vacuum
- Vibration

INDUSTRY EXPERTISE

- Nuclear
- Aerospace
- Agricultural
- Biomedical
- Engineering
- Electrical
- Pharmaceutical
- Wineries
- Manufacturing
- Fabrication
- Food Processing
- Government
- Breweries
- Mechanical

Environmental Lab

Powering Our Future Through Excellence

Energy Northwest Precision Labs provides a wide range of environmental monitoring and analytical services to individual, municipal, commercial and utility customers. Our team provides the highest quality chemical analysis, environmental permitting and regulatory compliance, and environmental & radiochemical analysis.

Our commitment to professional standards is complemented by state-of-the-art instrumentation that ensures consistent high-quality results across a broad range of capabilities.

- Drinking Water Analysis
- Wastewater & Groundwater Testing
- NPDES Testing Requirements
- Hazardous Waste Characterization
- Environmental Permitting and Regulatory Compliance
- Cross Connection Control
- Lubricant & Oil Analysis
- Cooling System Analysis
- Material Certification Testing
- Radiological Monitoring and Analysis
- Water System Operations
- Lead and Copper testing for daycare and school facilities
